

°C-Day: Fill The Hill

Proclamation of Support

°climate day

This October 24, we wish we could be standing on Parliament Hill with thousands of fellow Canadian residents and in solidarity with people all around the world. In fact, we **would** be in Ottawa if we could get there in a way that was both affordable, and satisfied our personal commitments to a low carbon footprint (a hint that this country is in desperate need of accessible sustainable transportation). We, the undersigned,

demand the government make the commitments below. Thereby, although we will not be physically present on Parliament Hill on C-Day, we are counted in the crowd for we shall be there in spirit and signature.

Consider us on The Hill calling for:

- **Mitigation - GHG Reduction targets based on science, not political convenience**
 - Create and enact a clear **national program** to meet such targets
 - As Canada's delegates, lead, follow, or get out of the way to allow a strong, binding global agreement in **Copenhagen**
- **Adaptation - Equitable climate action**
 - Invest now in **adaptation** strategies domestically and internationally, with a focus on support for the world's poorest people
 - Ensure that international negotiations and targets are **fair and accountable**
- **Transition to a green economy**
 - Fulfill the **need** for **green jobs**, skills training and **just transition** for workers
 - Power Canada with **renewable energy** and launch massive improvements in **conservation** and **efficiency** to stop wasting so much energy
 - Apply **green solutions** to urban design and transportation nation-wide
